Maryland Tripoli Report

©B.Booker 4/5/98

Cover: T. Nist K458 going for Sky.

Editor's corner:

Editor Bob Utley

Another one so soon! Well, there is some catching up to do. Also, I did not want the newsletter too big, to save on postage.

In the MEMBERSHIP listing I don't have all the TRA numbers if you would be so kind as to give them to either me or D. Weber please. If you find any mistakes, let me know.

I want to thank Bob Booker for the pictures. Now if he could take some pictures of my rockets for the cover.

Treasurer report:

Treasurer David Weber

Was it Mexico or Europe that I heard, just kidding. There is over $2000.00 in the bank.

meeting summary:

April 23, 1998

D. Bullis let us all know that he has a FAA waver for every Sunday this summer (June-August), now he has to get the dates for the Sod Farm set. Sod Farm owner will only allow us to fly on Sundays. Dave was thinking of two dates or possibly one date per month, with a rain date later that month.

As for the next launch, Dave is hoping to have one more at Higgs farm. Could not give a date but was hoping for May 16.

D. Bullis talked about the upcoming O rocket in Delaware, as soon as he gets more information he will pass it along. The date for the launch is May 9.

We moved on to the battery issue. D. Bullis wanted to replace the batteries for the launch system, a member donated 12 batteries to the club. It was then agreed to have 6 more launch pads built, for 1/2" and above that allow the pads to be adjustable.

Dave did not make it to RATS, but might try for Level 3 at Culpepper. There were 7 level 3's at RATS on Saturday. Sunday there was only one launch, then rained out. (I was there to film Dave's level 3, but got some good video of Fred Wallace, Nelson Wallace some other friends and the Darnell's rockets. The Darnell's lawn darted again.)

Another 50/50 drawing, but I did not win, enough said.

Dave had the meeting member thank me for the newsletter, he called me MR.UTLEY. Hey Dave, it's Bob, please, I'm not that old.

Ken showed up and that ended the meeting.

Upcoming launches:

put launch date in this space.

Launch summary:

Summary of March 14 launch at Higgs field. Followed by April 4 & 5 , at Higgs field.

March launch was a little wet and the wind was clocked at 19.5 mph, so it was safe. Art Boorman tried for the 2nd time to cert. L2, but forgot to drill a hole for the tube pressure, better luck next time Art. Ivan Barnsley did cert L1 on his Hummer, this rocket has a big round fin on the bottom and increases the motor noise, very nice flight. Adom Gulliams Jay Hawk woke everyone up when it made a turn into the flight line, I counted 3 people that jumped over it, it was only 6 inches off the ground. Tommy Higgs food was a warm welcome that day too.

April 4, I did not arrive until about 2 p.m. and there were flights going on. This was the Barnsley & Darnell show, 13 of the 15 flights. Art tried again, this time the motor cato on the pad. Of course once we shut down the pads, the wind stop and the clouds left the area.

April 5, 5500 ft ceiling and the wind was a little strong for the big rockets in the morning. Many small rockets were going off until Art went for the 4th time, Great flight only to end in a lawn dart. Art do not feel bad, I counted about 10 more LDs that day. Curtis Farrell L952 with a camera on board, nice flight. Fred Wallace showed us the motor from RATS great flight, but it joined the lawn dart club. Fred then came back with a beautiful Yellow Jacket that almost joined the club, ejection was about 20 feet above the ground. Dave Bullis sent The Monster to the air on a K1700, and Nelson Wallace reminded us of all the times it lawn darted, Dave showed us how it's done, Great flight. Curtis Farrell came back with a I-Roc on a K458, the flight was great but the noise cone can off at ejection. Finally the one everyone was waiting for (at least I was) was the 17 foot plus Terrier/Sandhawk on a L952, flight was great and lifted to 4500 feet, then the noise cone came off and the shock cord zippered the body tube. Tommy added sausages to the kitchen, very good I must say.

Important news:

See Calendar of coming events in the area on the last page. Until Oct. our launches will be held at the Central Sod Farm.

Tech tips:

There are lots of high, fast rockets lately, so remember to put a hole in the chute bay of the rocket body. This will help keep the pressure in the body tube the same as the pressure outside. Otherwise it will blow the chute on the way up.

Members Responsible:

A club is a group of people that enjoy doing the same activity. Swapping stories, experiences, and helping others with projects. Good clean fun.

Ever talk to Dave Bullis? Hard to do sometimes isn't ? Why is that ? Well, Dave gets the FAA waver, set-ups the field for the next launch, runs the meetings, gets the Tripoli info. direct from Headquarters, does the Cert level flights, set-up and takes down the launch equipment, maintains the launch equipment, and sits there all day in rain or shine, LCO, RSO and BS at all the launches. Now image what it would

be like if Dave was not around, no not dead, just tired of doing it all. That's where you come in, you may not be qualified to be RSO but that's it, you are qualified for everything else. So pick something and join in. You don't have to do it every launch but when you can. Set-up is hard for me to do, but take down is not, RSO is hard for me but LCO is not, Help in cleaning the equipment is easy, every time you go to the pad clean the rod and the clips, you do it so your rocket will fly better, see caught you. If you are having a bad rocket day, don't go home, LCO. You don't have to spend hours doing it, try taking it for an hour and pass it on. Give Dave a chance to eat lunch, fly a rocket, or go to the john.

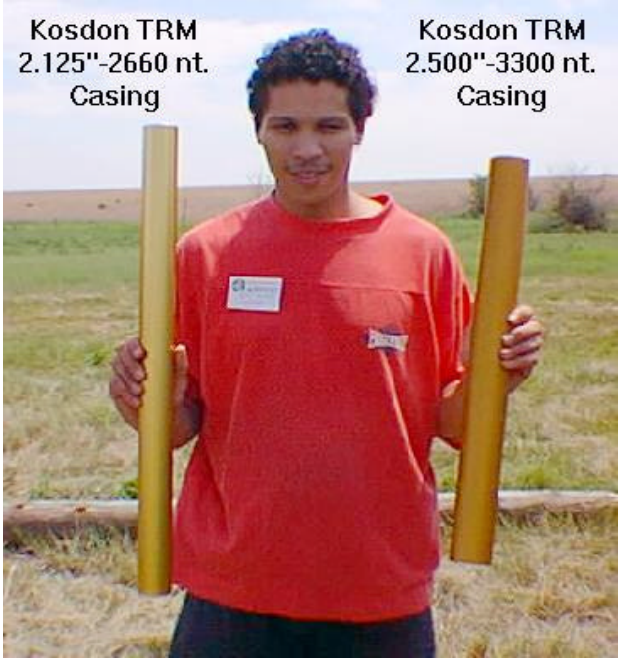
Were a club, so don't put it all on one person. Some of you have helped, I would like to see some more help that's all.

Performance hobby

Ken now has a web page at *http://www.performancehobbies.com* and Sky Angle chutes in stock. Almost anything you could need he should have. Phone: (202) 723-8257

next issues:

- Launch Summary May & June
- Events for July & August
- Information on LDRS 17
- Pictures of our Launches ?



MOST WANTED

Misc. Notes:

If any members have video tape of our launches, let me know. I would like to put a tape together of the launches. I was thinking of the members rockets and maybe some one-of-a-kind rockets too. I will need the format in VHS, sorry I can not convert from 8mm. I have some of the launches from Sept 97 to present, but not all the rockets launched.

keep the pointy end up
and the fiery end down
D. bullis
